

De Montfort University / Leicester Outdoor Pursuits Centre Design Concept Evaluation Project 2022

Please give us your feedback!

This survey is part of a stakeholder consultation process for a Design Exchange Partnership project funded through the Arts & Humanities Research Council by The Design Museum and Innovate UK (grant reference AH/W008173/1). The project is a collaboration between De Montfort University, Leicester Outdoor Pursuits Centre (LOPC) and De Montfort PhD candidate and design researcher, Zainab Mohammed.

The project aims to explore potential options for the redevelopment of the LOPC site to realise its net zero/carbon neutral ambitions. The aim of the project is to develop a design concept that builds on the rich heritage of LOPC and to explore the potential for a facilities complex that appeals to regional, national and potentially international audiences and stakeholders in outdoor pursuits, including communities, schools and educational providers, sports centres and local people. At the heart of the design concept, we are considering how the Government's net zero goals can be built into a future LOPC site and facilities.

This part of the project requires your input! As a recent user of LOPC facilities, we seek your views of the current and future opportunities for LOPC, the site and range of activities, and the high-level concepts that have been developed as a preliminary reflective aid through this project. Design concepts include a range of sustainability ideas for achieving LOPC's aims.

Your participation is entirely voluntary and participation in this online survey will take approximately 15 minutes. Prior to commencing the survey, we ask you to watch a video about the proposed redevelopment concept - this is important because some of our questions relate to the video. The video is 14 minutes long and a link to the video is [HERE](#).

The intended outcome from our analysis of the data collected from the survey is to provide baseline information from a preliminary stakeholder consultation process for new LOPC buildings as well as explore the land- and water-based activities programme.

The information you provide is confidential, except that anonymised quotes may be used. Information you provide will be treated only as a source of background information, alongside literature-based research and interviews with others.

No personal identifying information will appear in any publications resulting from the answers you provide.

If you have any questions or would like additional information, please contact either Prof Tracy

Harwood (tharwood@dmu.ac.uk), the project lead, or Zainab Mohammed, the design researcher (Zainab.mohammed@my365.dmu.ac.uk).

By participating in the survey, you indicate that you understand its purpose and consent to the use of the data as indicated above. Should you decide not to participate, please contact Tracy Harwood.

The project data collection processes have been approved through De Montfort's ethics committee. The project is being overseen by Tracy Harwood and when the research is complete, a report of key findings will be available for those who request a copy.

Thanks for participating!

Thank you for your responses

We appreciate your feedback and comments. Thanks for taking the time to tell us about your current use of LOPC and your views of the design concept for a proposed redevelopment of LOPC.

Please note, this is a preliminary consultation of LOPC stakeholders and not confirmed plans. As this project develops, you will have future opportunities to comment on proposals.
